MBA - General	Graduation Rate	66.7%
MBA - Accounting	Graduation Rate	36.4%
MBA – Not-for-Profit Management	Graduation Rate	33.3%

Indicators Used

INDICATOR	DESCRIPTION AND HOW IT WAS CALCULATED
A.A. Graduation Rate	The rate reflects the percentage of students who started the program in the 2014-2015 year and completed in 4 years or less. The group includes 1 st year and transfer students who declared their major within the 2014-2015 year. Associate’s Degree graduation rates include associate-seeking students who received a Bachelor’s degree within the time period as well. Students who switched majors but graduated from Chaminade count against this rate, as do students who did not graduate from Chaminade.
B.A. Graduation Rate	The rate reflects the percentage of students who started the program in the 2012-2013 year and completed in 6 years or less. The group includes 1 st year and transfer students who declared their major within the 2012-2013 year. Students who switched

	majors but graduated from Chaminade count against this rate, as do students who did not graduate from Chaminade.
B.S. Graduation Rate	The rate reflects the percentage of students who started the program in the 2012-2013 year and completed in 6 years or less. The group includes 1 st year and transfer students who declared their major within the 2012-2013 year. Students who switched majors but graduated from Chaminade count against this rate, as do students who did not graduate from Chaminade.
MBA Graduation Rate	The rate for each MBA program reflects the percentage of students who started the program in the 2014-2015 year and completed in 4 years or less. The rate does not account for students who switched concentrations. For example, if a student was declared with an Accounting concentration and switched to and graduated as a general MBA, that counts against the Accounting MBA graduation rate but not for the General MBA.
